

STUDY PROGRAM: University Double Graduate Study in Philosophy

CORE LEARNING OUTCOMES OF STUDY	
<i>Learning outcomes of study program</i>	<i>Individual study program outcomes</i>
Philosophical disciplines – concepts and theoretical directions	In-depth analysis of more complex philosophical concepts and concerns, and their proposed solutions by specific disciplines and sub-disciplines in philosophy
	Comprehend, critically analyze and contextualize philosophical theories within specific disciplines and sub-disciplines and independently evaluate which theory best answers the problems posed
	Critically interpret and evaluate traditions, directions, exponents and approaches in philosophy
	Critically contextualize, compare and evaluate philosophical concepts and debates within specific historical periods, directions and approaches
	Problematize the meaning and significance of philosophy in comparison to other related fields and disciplines, contemporary culture and society
Advanced critical-analytical skills and methodology	Critically apply tools of informal logic to identify, analyze and explain arguments when solving philosophical problems
	Analyze and evaluate the logical structure of more complex texts, demonstrate logical relationships and recognize typical mistakes in argumentation
	Critically apply and demonstrate complex methods and strategies of critical thinking
	Adopt advanced skills in independent reading and interpretation of classic philosophical texts skills
	Compare debates that mark specific disciplines in contemporary philosophy collectively, and general debates in philosophy and other related fields and disciplines
	Comprehend, analyze and compare methodological approaches in different philosophical domains
	Independently create academic works using relevant literature using academic convention in citing, paraphrasing, referencing and writing a bibliography
	Apply theoretical settings of different domains of philosophy on real life social problems and situations
	Acquire and improve independent and lifelong skills in learning for the purposes of individual professional action and social and civic involvement
General academic competencies	Formulate, justify and defend personal philosophical beliefs and theories
	Differentiate methodologies and approaches in philosophical writing and justify specific

	texts
	Critically analyze scientific literature and sources
	Evaluate different theoretical approaches in philosophy and other general social humanities subjects
	Apply different theoretical concepts, philosophical approaches and methods of analysis, interpretation and evaluation of social and cultural phenomena and daily processes
	Connect and apply the acquired knowledge and skills through professional institutional activities
